Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1,3,4 and 6-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gutman et al WO 03/097603 in view of Wouters et al Eur. J. Med. Chem. vol. 35 pp 923-929.

The references are applied as in the previous office action.

Applicants' comments have been noted and considered but are not deemed persuasive of patentability. It is noted with regard to the comments drawn to trialkylamine, that applicants are referring to a reference not applied in the previous office action. Namely, the Delarge J., Ann. Pharm. Fr. 36 (1978). It is also noted that Wouters et al was applied to show using an organic solvent, acetone-water, in an analogous process.

No claim is allowed.
